*This information is presented as supplemental to the GIPS Report, which can be found [here](#). Strategy Performance, Strategy Characteristics, Strategy Sector Weights, Top Holdings, and Strategy Statistics are reflecting the aggregate composite for the strategy. As such, individual accounts performance, weights, statistics, and characteristics may vary. All performance related statistics are calculated using net of fee performance if not labeled and are compared to the strategy benchmark, the Russell 2000 Index. As of December 31, 2022, Eastern Shore Capital Management manages or advises \$646M for its Small Cap equity clients, with \$497M in assets under management and \$149M in advisory-only Unified Managed Account ("UMA") business.

**Past performance is no guarantee of future results. Please see the reverse side of this document for additional required GIPS® disclosures.

†Inception date is 03/01/07. 2007's return represents a partial year beginning at the inception of the fund on 3/01/2007 and is not annualized. Performance from March 1, 2007 through October 26, 2012 occurred while Robert Barringer was the strategy's sole Portfolio Manager at FBR Asset Management.

Investing in Eastern Shore Strategies carry certain risks:

- Key risks include the general risks of common stock investments and specific risks due to the concentration of the portfolio within specific securities, countries, and sectors.
- Concentration of the strategy is significantly different that the broad-based benchmark.
- The value of the Strategy may decrease in response to the activities and financial prospects of an individual security in the strategy's portfolio.
- The performance of the Strategy may be subject to substantial short-term changes. Stocks of smaller companies may be subject to additional risks, including the risk that earnings and prospects of these companies are more volatile.
- These factors may affect the value of your investment.

**This information is presented as supplemental to the GIPS Report, which can be found [here](#). The securities identified and described do not represent all of the securities purchased, sold or recommended for client accounts. The reader should not assume that an investment in the securities identified was or will be profitable. Statistics are calculated using gross of fee performance. Strategy Performance, Strategy Characteristics, Strategy Sector Weights, and Top Holdings, Strategy Statistics are reflecting the aggregate composite for the strategy. As such, individual accounts performance, weights, statistics, and characteristics may vary.

The information contained in this document is subject to updating and verification and may be subject to amendment. No representation or warranty is expressed as to the accuracy of the information contained in this document and no liability is given by Eastern Shore Capital Management as to the accuracy of the information contained in this document and no liability is accepted for any such information. This document and the information contained within it are confidential and intended solely for the use of the individual or entity to whom they are addressed. If you are not the named addressee you should not disseminate, distribute or copy this document or any of the information contained within it. If you are not the intended recipient you are notified that disclosing, copying, distributing or taking any action in reliance on the contents of this information is strictly prohibited.

Past performance is not necessarily indicative of future results. This document includes returns for the Russell 2000 index. The Russell 2000 Index measures the performance of the small-cap segment of the U.S. equity universe. The Russell 2000 is a subset of the Russell 3000® Index representing approximately 10% of the total market capitalization of that index. It includes approximately 2000 of the smallest securities based on a combination of their market cap and current index membership. This index is not intended to be a direct benchmark for a particular strategy, nor is intended to be indicative of the type of assets in which a particular strategy may invest. The assets invested in on behalf of a client will likely be materially different from the assets underlying this index and will likely have a significantly different risk profile. Performance statistics, portfolio characteristics, portfolio holdings and other information included in this presentation are targets only and may change without notice to the client. The value of investments can go down as well as up. A client may not get back the amount invested.

†Inception date is 03/01/07. For the period of March 1, 2007 through October 26, 2012, the performance presented occurred while the Portfolio Manager was at a prior firm. Performance for this period has been calculated using custodial transactions for the fund while it was managed as a mutual fund (FBRVX) at FBR Asset Management. Eastern Shore Capital Management has met the requirements for claiming performance record portability and keeps the appropriate books and records as well as a portability memo on file. The Eastern Shore Capital Management Small Cap Equity Composite has undergone a portability examination for the period of March 1, 2007 through October 26, 2012.

Past performance is not indicative of future results. Returns are presented gross and net of management fees and include the reinvestment of all income. Net of fee performance was calculated by retroactively applying the maximum model composite fee (.90%). More information about such fees and expenses applicable to a client's investment are generally available in the Form ADV Part 2A of Moody Aldrich Partners, LLC, which is publicly available and upon request and provided to every client (along with Form ADV Part 2B) prior to investment. A client's return will be reduced by the advisory fees as described in Form ADV Part 2A and other expenses incurred by the account. For example, an annual advisory fee of .90% compounded quarterly over 3 years will reduce a gross 28.92% annual return to a net 28.1% annual return. Actual returns may vary from the performance information presented. All performance numbers are expressed in US Dollars. This product does not use leverage, derivatives or short positions in its portfolio. † 2007's return represents a partial year beginning at the inception of the fund on 3/01/2007 and is not annualized.
